1 Introduction

1.1 What is OhMyGAD?

OhMyGAD is a web-based information system built for the **Gender and Development (GAD)** office of UPB. It helps admin staff manage events, surveys, guidelines, and user accounts — all from one place.

1.2 Who Is This Manual For?

This manual is written for users who have been given the **Admin** role. Admins have the highest level of access and can manage all parts of the system, including creating and editing events, surveys, guidelines, and user accounts.

1.3 How to Use This Manual

- Each section covers one major page or feature of the system.
- **Screenshots** are provided to help you identify what you see on screen.
- **Field tables** list every input you can fill in, along with its character limit and what the system checks for (validation rules).
- Fields marked with an asterisk (*) are required — the form will not submit without them.

1.4 Accessing the System

1. Open your web browser (Chrome, Firefox, or Edge recommended).
2. Navigate to this link: <https://upb-kasarian-omg.vercel.app/>
3. Enter your **Admin Mail** and **Password**, then click **Login**. Alternatively, click **Sign in with UP Mail** to log in using your Admin Google account.
4. You will be taken directly to your **Dashboard**.

Figure 1: Login Page

2 Dashboard

After logging in, you will land on the **Dashboard**. This page gives you a comprehensive overview of the system's activity, user statistics, attendance trends, survey responses, and quick access to common administrative tasks.

Figure 2: Admin Dashboard — Overview

Figure 3: Admin Dashboard — Overview (Scrolled)

2.1 Key Performance Indicators (KPIs)

At the top of the dashboard, you will see four stat cards displaying summary of system information:

- **Registered Users** — Total number of user accounts created in the system.

- **Onboarded Users** — Number of users who have completed the onboarding process.
- **Total Events** — Total number of GAD-related events created in the system.
- **Active Surveys** — Number of surveys currently open for responses.

Figure 4: Admin Dashboard — Key Performance Indicators

2.2 Global Search

At the top of the dashboard, you will find the **Search bar**.

Field	Required	Limit	Validation & Notes
Search query	No	64 chars	Type a keyword to search events, guidelines, surveys, or user data. Results appear instantly as you type. Minimum 1 character required.

Figure 5: Dashboard — Global Search and Filters

Figure 6: Dashboard — Global Search Dropdown

2.3 Dashboard Filters

The **Filters** panel allows you to refine the user data displayed across the dashboard. When you apply filters to select specific users, all analytics charts and statistics automatically

recalculate to show only data for those filtered users. This helps you analyze demographics and engagement patterns for specific student or faculty groups.

2.3.1 How Filters Work

Filters work by identifying which users match your selected criteria, then updating all dashboard analytics to reflect only those users' data. Here's what happens:

1. You select one or more filter criteria (e.g., College: CS, Year Level: 3rd Year).
2. The system queries the user database to find all profiles matching your filters.
3. All dashboard data (KPIs, charts, attendance) recalculates to show only statistics for those matched users.
4. If filters match zero users, all metrics display as empty or zero.

2.3.2 Opening the Filter Panel

Click the **Filters** button at the top of the dashboard (next to the Search bar) to open the filter panel. A dropdown will appear with multiple filter categories.

The screenshot shows the 'Filters' panel on a dashboard. It features a search bar at the top right with a 'Filters' button. Below the search bar, there are several filter categories, each with a list of options and checkboxes:

- # YEAR LEVEL**: 1st Year, 2nd Year, 3rd Year, 4th Year, Extende
- COLLEGE**: CS, CAC, CSS
- SEX AT BIRTH**: Male, Female, Intersex, Prefer not to say
- GENDER IDENTITY**: Man, Woman, Non-binary, Genderqueer, Genderfluid, Prefer not to say
- DEGREE PROGRAM**: BS Biology, MS Mathematics, Certificate in Fine Arts, BS Management Economics, BS Computer Science, Doctor of Philosophy in Mathematics, MA Language and Literature, MA History (Ethnohistory and Local History), BS Mathematics, BA Communication, BA Social Sciences (History), MA Social and Development Studies, BS Physics, BA Fine Arts, BA Social Sciences (Economics), Master of Management, MS Conservation and Restoration Ecology, BA Language and Literature, BA Social Sciences (Anthropology), Doctor of Philosophy in Indigenous Studies
- ROLE**: Admin, Staff, Student, Faculty

Figure 7: Dashboard — Filter Panel

2.3.3 Selecting Filters

To select filters, click on the **checkbox** to the left of each option. Once you select, they will appear as coloured **chips** (small rounded labels) below the toolbar. Multiple filters can be active at the same time. To remove a single filter, click the **X** on its chip. To

remove all filters at once, click the “Clear all” link that appears when any filter is active. The **Filters** button at the top of the dashboard displays a badge showing how many filters are currently active. This gives you a visual indicator of how many filter criteria you’ve selected without needing to open the filter panel.

Figure 8: Dashboard — Selected Filter Option

Figure 9: Dashboard — Active Filter Chips

Figure 10: Dashboard — Active Filter Button

2.3.4 Filter Categories

The filter panel is organized into six main categories. You can select multiple options within each category, or combine options across categories.

Year Level Filter users by their academic year. Select one or more:

- **1st Year, 2nd Year, 3rd Year, 4th Year** — Student year of enrollment.
- **Extendee** — Students who have extended beyond the normal graduation timeline.

College Filter users by their college of enrollment. Select one or more:

- **CS** — College of Science.
- **CAC** — College of Arts and Communication.
- **CSS** — College of Social Sciences.

Degree Program Filter users by their specific degree program. Select one or more from the list:

- **College of Science programs:**

- BS Biology
- BS Computer Science
- BS Mathematics
- BS Physics
- MS Conservation and Restoration Ecology
- MS Mathematics
- Doctor of Philosophy in Mathematics
- **College of Arts and Communication programs:**
 - BA Communication
 - BA Fine Arts
 - BA Language and Literature
 - Certificate in Fine Arts
 - MA Language and Literature
- **College of Social Sciences programs:**
 - BA Social Sciences (History)
 - BA Social Sciences (Economics)
 - BA Social Sciences (Anthropology)
 - BS Management Economics
 - MA History (Ethnohistory and Local History)
 - MA Social and Development Studies
 - Master of Management
 - Doctor of Philosophy in Indigenous Studies

Sex at Birth Filter users by sex at birth data. Users who did not provide this information can be included via the “Prefer not to say” option. Select one or more:

- **Male, Female, Intersex** — Biological sex categories.
- **Prefer not to say** — Users who chose not to disclose this information.

Gender Identity Filter users by their gender identity. Select one or more:

- **Man, Woman** — Binary gender identities.
- **Non-binary, Genderqueer, Genderfluid** — Non-binary gender identities.
- **Prefer not to say** — Users who chose not to disclose.

Role Filter users by their system role. Select one or more:

- **Admin** — System administrators at the Kasarian Gender Studies Program Office.
- **Staff** — Administrative Office Personnel.
- **Student** — Student users.
- **Faculty** — Faculty and teaching staff.

Note: *By default, administrators are excluded from dashboard statistics unless you explicitly select the Admin role in your filters. This is to keep the focus on student and faculty engagement data.*

2.3.5 What Changes When Filters Are Applied

When you apply user filters, the following dashboard elements update automatically to reflect only the selected users:

KPI Cards (top of dashboard)

- **Registered Users** — Total count of users matching your filters.
- **Onboarded Users** — Count of filtered users who have completed onboarding.

Analytics Charts

- **Users per College** — Shows the college distribution only for your filtered users (not all users in the system).
- **Users Sex at Birth** — Displays sex at birth demographics for filtered users only.
- **Users Gender Identity** — Shows gender identity breakdown for filtered users only.

Attendance Over Time Chart

- Shows attendance counts only for events attended by filtered users.
- If you filter by College: CS, only attendees from the College of Science are counted.
- Multi-day events are counted in every time bucket they span (e.g. if an event runs across two days, both days show attendance for that event).

2.3.6 Combining Multiple Filters

You can apply multiple filters simultaneously to narrow down into specific user groups. When multiple filters are selected, the dashboard shows data matching **all** selected criteria.

Key point: When you select multiple options *within the same category* (e.g., both 1st Year and 2nd Year), the dashboard shows users matching *any* of those options (OR). When you combine *different categories* (e.g., Year Level AND College), the dashboard shows only users matching *all* selected criteria (AND).

Example filter combinations:

- **College: CS + Year Level: 3rd Year** — Data for 3rd year students in the College of Science only (excludes 1st, 2nd, 4th year CS students and students from other colleges).
- **Role: Student + College: CAC + Gender Identity: Woman** — Analytics for female students in the College of Arts and Communication (excludes male, non-binary students and all faculty/staff).
- **Year Level: 1st Year + Year Level: 2nd Year** — Data for students in their 1st or 2nd year (combines both cohorts into one view).
- **Role: Faculty + College: CSS** — Shows all faculty members in the College of Social Sciences, regardless of department or program.

2.3.7 Filter Logic Examples

To clarify how the AND/OR logic works:

- **Filters: [1st Year OR 2nd Year] AND [College: CS]** — Shows 1st or 2nd year students from College of Science (users must be CS students, but can be either year).
- **Filters: [College: CS OR CAC] AND [Role: Student]** — Shows students from College of Science or College of Arts and Communications (users must be students, but can be from either college).
- **Filters: [Male] AND [College: CSS] AND [Degree Program: BA Social Sciences (History)]** — Shows only male students in BA Social Sciences (History) program within College of Social Science (matches all three criteria).

2.3.8 Clearing Filters

To remove all active filters and return to the full unfiltered dashboard view, click “Clear all” when filters are active. This will reset all analytics to display data for all users in the system (excluding admins by default).

2.3.9 Empty Results

If filters match zero users (for example, filtering for a nonexistent degree program + specific college + year combination), you will see:

- KPI Cards showing 0 Registered Users and 0 Onboarded Users.
- All charts (college, demographics, attendance) displaying empty states or zero values.

This is expected behavior and indicates that no users in your system match all the selected filter criteria.

Figure 11: Dashboard — Empty KPI Results

Figure 12: Dashboard — Empty User Data Results

2.3.10 Tips for Using Filters Effectively

- Apply college filters one at a time to compare participation rates between CS, CAC, and CSS.
- Filter by year level to see how engagement changes as students advance through their degree (e.g., do 4th year students attend more or fewer events?).
- Use gender identity and sex at birth filters to monitor inclusivity in your events and programs.
- Combine filters to find student populations with lower engagement (e.g., Female + CSS + 1st Year).
- Filter by Role to see differences in participation between students, faculty, and staff.
- Use filters before taking screenshots to focus on the specific user group you need to report on.
- When combining filters, verify the KPI counts are reasonable for the population you're analyzing. If counts seem too low, you may have combined incompatible filters.

2.4 Attendance Over Time

This line chart displays total event attendance trends over a selected date range. Use this to identify peak attendance periods and monitor engagement trends.

- **Date Range Picker** — Click to select a custom date range. By default, the last 7 days are shown.
- **Chart** — Shows the number of attendees per period (weekly or monthly depending on the date range).
- **Interactive Tooltips** — Hover over data points to see exact attendance figures.

Figure 13: Dashboard — Attendance Over Time Chart

2.5 Quick Actions

On the right side of the dashboard, you will find a **Quick Actions** card with buttons for the most common administrative tasks:

- **New Event** — Click to create a new event. Opens the Event Form modal.
- **New User** — Click to manually add a new user account. Opens the User Form modal.
- **New Guideline** — Click to publish a new guideline document. Opens the Guideline Form modal.
- **New Survey** — Click to create a new post-event survey. Opens the Survey Form modal.

Figure 14: Dashboard — Quick Actions Card

2.6 Analytics Section

The dashboard includes three detailed analytics charts to monitor user demographics and engagement:

2.6.1 Users per College

A bar chart showing the breakdown of registered users by college (CS, CAC, CSS). Use this to understand which colleges have the highest participation rates. Hovering over a bar displays the exact count for that college.

Figure 15: Dashboard — Users Per College Chart (Default State)

Figure 16: Dashboard — Users per College Chart (Hovered State)

2.6.2 Users' Sex at Birth

A donut chart displaying the distribution of users by sex at birth (Male, Female, Intersex, Prefer not to say). This data is used for institutional reporting purposes. Hovering over a

segment displays the exact count for that category.

Figure 17: Dashboard — Users Sex at Birth Chart (Default State)

Figure 18: Dashboard — Users Sex at Birth Chart (Hovered State)

2.6.3 Users' Gender Identity

A donut chart showing the distribution of users by gender identity (Man, Woman, Non-binary, Genderqueer, Genderfluid, Prefer not to say). This data supports the university's commitment to inclusive gender representation. Hovering over a segment displays the exact count for that category.

Figure 19: Dashboard — Users Gender Identity Chart (Default State)

Figure 20: Dashboard — Users Gender Identity Chart (Hovered State)

2.7 Response Rate by Survey

This horizontal bar chart displays survey completion rates across all active surveys. Each bar shows the percentage of completed and incomplete responses. Hovering over a segment shows the exact number who answered.

- **Search Surveys** — Use the search box to search surveys by title or description.
- **Completed (green)** — Percentage of respondents who finished the survey.

- **Incomplete (yellow)** — Percentage of respondents who started but did not complete the survey.
- **Pagination** — If more than four surveys are displayed, use the pagination controls to view additional surveys.

Figure 21: Dashboard — Response Rate by Survey

Figure 22: Dashboard — Response Rate by Survey (Hovered State Complete)

Figure 23: Dashboard — Response Rate by Survey (Hovered State Incomplete)

2.8 Right Sidebar

2.8.1 Mini Calendar

A compact monthly calendar shows:

- **Event Start Days** — Dates with events that start on that day show a pink dot below the date.
- **Event Ongoing Days** — Dates with ongoing events on that day show a periwinkle dot below the date.
- **Day Selection** — Click any day to view all events scheduled for that date in a modal popup.

Figure 24: Dashboard — Mini Calendar

Figure 25: Dashboard — Mini Calendar (Selected Date)

2.8.2 Today's Timeline

Below the calendar, a timeline displays all events happening today, organized by time.

- **Event List** — Shows event title, time, and location.
- **Event Click** — Click an event to open its full detail modal for editing or viewing.
- **Empty State** — If no events are scheduled today, a message will appear.

Figure 26: Dashboard — Today's Timeline

3 Events Management

The **Events Management** page lets you view, create, edit, and delete all GAD-related events such as orientations, forums, research sessions, training, and workshops. You can search, filter, sort, and export event data, as well as manage event registrations and attendance.

Figure 27: Events Management Page — Overview

3.1 Toolbar and Controls

At the top of the Events page, you will find several controls for searching, sorting, filtering, exporting, and creating events:

Figure 28: Events Management Page — Toolbar

3.1.1 Search Bar

Type a keyword to search events by title, category, or location. Results filter in real-time as you type.

Field	Required	Limit	Validation & Notes
Search query	No	—	Type to search by event title, category name, or location. Searches are case-insensitive. Clearing the search box shows all events again.

Figure 29: Events Management Page — Search

3.1.2 Sort Dropdown

Click the **Sort** button (with an up/down arrow icon) to open the sort menu. You can sort events by:

- **Title** — Alphabetically by event name, ascending or descending.
- **Category** — Alphabetically by event category, ascending or descending.
- **Status** — By status (Past, Today, Upcoming).
- **Date** — By start date, ascending or descending (default).

Click the same sort option again to reverse the sort direction (ascending ↑ or descending ↓). The current sort field and direction are displayed on the button. You can also click “Reset sort” in the menu to return to the default sort (Date, descending).

Figure 30: Events Management Page — Sort Options

3.1.3 Filter Dropdown

Click the **Filter** button (with a sliders icon) to open the filter panel. The filter button displays a badge showing the number of active filters (e.g., “Filter 2” if two filters are selected).

You can filter events by:

Status

- **Today** — Events happening on the current date.
- **Upcoming** — Events that have not yet started.
- **Past** — Events that have already ended.

Category

- **GSO** — Gender Sensitivity Orientation.
- **ASHO** — Anti-Sexual Harassment Orientation.
- **Forum** — Discussion forums and panel events.
- **Research** — Research sessions and seminars.
- **Training** — Skill-building and professional development.
- **Workshop** — Hands-on workshop events.

You can select multiple categories and statuses. For example, selecting both “Upcoming” and “Today” shows all events happening today or in the future.

Figure 31: Events Management Page — Filter Options

Active Filter Chips Once you apply filters, they appear as coloured **chips** below the toolbar. Each chip shows the filter name and an “×” button to remove it. You can also click “Clear all filters” in the filter dropdown to remove all active filters at once.

Figure 32: Events Management Page — Active Filter Chips

3.1.4 Export to CSV

Click the **Export CSV** button to download all events (including current filters and search results) as a CSV file. The file includes:

- Event Title
- Event Category (GSO, ASHO, Forum, Research, Training, Workshop)
- Number of registrations and attendees.
- Event Description
- Event Location
- Event Start Date
- Event End Date
- Event Capacity
- Event Registration Opening Date
- Event Registration Closing Date

The downloaded file is named with the current date (e.g., `events_list_2026_05_23.csv`).

Figure 33: Events Management Page — Export CSV Button

3.1.5 Add Event Button

Click the **Add Event** button to create a new event. This opens the event creation form (see Creating or Editing an Event below).

Figure 34: Events Management Page — Add Event Button

3.2 Viewing and Interacting with Events

Events are displayed in a table with the following columns:

- **Title** — Event name (truncated if too long; hover to see full title).
- **Category** — Event category badge.
- **Status** — Colour-coded status badge (Past, Today, or Upcoming).
- **Start Date** — Event start date and time.
- **End Date** — Event end date and time (or “—” if not set).
- **Capacity** — Maximum number of attendees.
- **Location** — Venue name (truncated if too long; hover to see full location).
- **Actions** — Edit and Delete buttons.

3.2.1 Viewing Event Details

Click anywhere on an event row to open the **Event Detail Modal**. This modal displays:

- Full event title and banner image.
- An **Export to CSV** button to export the details of the event. The CSV file includes the following:
 - Event Title
 - Event Category (GSO, ASHO, Forum, Research, Training, Workshop)
 - Event Status (Upcoming, Today, Past)
 - Event Location
 - Event Start Date
 - Event End Date
 - Event Capacity
 - Event Registration Opening Date
 - Event Registration Closing Date
 - Event Registered Users details:
 - * Registered User Display Name
 - * Resitered User Email
 - * Registered User Date Registered
 - * Registered User Attended (Yes/No)
 - Event User Attendance details:
 - * Total count of registered users who attended the event
 - * Event attendees Display Name

- * Event attendees email
- An **Edit** button to modify event details.
- Event Title
- Event Category (GSO, ASHO, Forum, Research, Training, Workshop)
- Event status (Upcoming, Today, Past)
- Event start date
- Event end date
- Event start time
- Event end time
- Event location
- Event capacity
- Event registration opening date
- Event registration closing date
- Event description
- Event registration tab:
 - Search bar to search for a specific user who is registered to the event
 - Total count of registered users
 - "Copy emails" button to copy all registered user's emails
 - Registered user display name
 - Resitered user email
 - Checkbox to mark registered user's attendance
- Event attendace tab:
 - Search bar to search for a specific user who attended the event
 - Total count of attended users out of the total registered users
 - "Copy emails" button to copy all attendee's emails
 - Attendees display name
 - Attendees email

Figure 35: Events Management Page — Event Detail Modal

3.2.2 Edit an Event

Click the **Edit** (pencil) icon in the Actions column, or click the **Edit** button in the event detail modal. This opens the event form in edit mode. Make your changes and click “Save Changes” to update the event. See *Creating or Editing an Event* below for field details.

3.2.3 Delete an Event

Click the **Delete** (trash) icon in the Actions column to delete an event. A confirmation modal will appear.

Figure 36: Events Management Page — Actions (Edit and Delete Icons)

Delete Confirmation

- The modal shows the event title you are about to delete.
- You must enter your password to confirm. This is a security measure to prevent accidental deletions.

- **Warning:** Deleting an event will permanently remove all registrations, attendance records, and linked surveys for that event. This action **cannot be undone**.

After confirming your password, the event and all associated data will be deleted, and you will see a success notification.

Figure 37: Events Management Page — Delete Confirmation Window

3.2.4 Pagination

If you have more than one page of events, pagination controls appear at the bottom of the table. Use the navigation buttons to move between pages. The display shows which events are currently shown (e.g., “Showing 1–10 of 47 events”).

Figure 38: Events Management Page — Event Pagination

3.3 Creating or Editing an Event

1. **Click the “Add Event” button or edit icon.** On the Events page, click the “Add Event” button to create a new event, or click the **edit (pencil) icon** on an existing event row to modify its details.
2. **Complete the two form sections.** The event form is organized into two primary sections: *Basic Information* and *Event Schedule*. See the subsections below for detailed field descriptions.
3. **Fill in the Basic Information.** Enter a clear and descriptive **Title**, specify the exact **Location**, define the attendee **Capacity**, and select the appropriate event **Category**.

You may also provide an optional **Description** and upload a **Banner Image** to make the event visually appealing.

4. **Configure the Event Schedule.** Carefully select the **Start Date & Time** and **End Date & Time**. The system will enforce that the end time logically occurs after the start time.
5. **Set the Registration Window.** Define the **Registration Opens** and **Registration Closes** dates. Ensure the registration window is open before the event concludes and allows users sufficient time to sign up.
6. **Fill in all required fields.** Fields marked with an asterisk (*) are required. You cannot submit the form without completing them. Optional fields, such as the banner image and description, may be left blank.
7. **Verify your information.** Review all entries and dates for accuracy before submitting. Pay special attention to the event schedule and registration window to ensure they logically align.
8. **Submit the form.** Scroll to the bottom of the form and click the “**Create Event**” button (for new events) or “**Save Changes**” button (for editing existing events). Wait until the submission is fully processed, especially if an image is uploading.
9. **Confirm success.** A green success notification appears confirming the event was created or updated. The page automatically returns to the events list.

Figure 40: Event Management Page — Edit Event Form

3.3.1 Creating vs. Editing an Event

The event form works in two modes: create mode (for new events) and edit mode (for modifying existing events).

Create Mode (Adding a New Event)

- **Access:** Click the “Add Event” button at the top of the Events page.
- **All fields blank:** All form fields start empty. You must fill in all required fields before submitting.
- **Submit button:** Shows “Create Event” at the bottom of the form.
- **Result:** New event is created and added to the system. Students and faculty can view it based on its schedule, category, and registration window.

Edit Mode (Modifying an Existing Event)

- **Access:** Click the edit (pencil) icon in the Actions column of an event row, or click the “Edit” button in the event detail modal.
- **Pre-filled fields:** All fields are pre-populated with the event’s current information.
- **Banner optional:** Leave the existing banner image unchanged, upload a replacement image, or remove it if no banner is needed.
- **Submit button:** Shows “Save Changes” at the bottom of the form.

- **Result:** Event details are updated. The updated information appears in the events list and event detail view.

Discard Changes Confirmation When creating or editing an event, if you close the form or navigate away with unsaved changes, a modal appears asking if you want to discard your changes.

- **“Keep Editing”** — Stay in the form to continue editing.
- **“Discard”** — Leave the form without saving. All changes are lost.

This prevents accidental loss of event details.

Figure 41: Event Management Page — Discard Changes Window

3.3.2 Basic Information Fields

Field	Required	Limit	Validation & Notes
Title *	Yes	500 chars	Cannot be empty. Briefly describe the event (e.g., “Gender Sensitivity Orientation”).
Description	No	5 000 chars	If provided, must be at least 10 characters long. Describe the purpose, agenda, and learning objectives of the event.
Location *	Yes	100 chars	Cannot be empty. Enter the venue name or building (e.g., “Sarmiento Hall, Room 101”). This is what students see when browsing events.

Field	Required	Limit	Validation & Notes
Banner Image	No	5 MB file	Accepted formats: JPG, PNG, or WebP. This image appears at the top of the event detail view and makes events more visually appealing. Click the upload area to choose a file, or click the × button to remove an uploaded image.
Capacity *	Yes	1 – 500	Must be a whole number greater than 0. Negative numbers and decimals are not allowed. This limits how many users can register for the event.
Category *	Yes	Dropdown	Choose one category: GSO, ASHO, Forum, Research, Training, or Workshop. This helps users filter events and is used for institutional reporting.
Status	Auto	—	Automatically calculated from the start and end dates. Display only. Possible values: <i>Upcoming</i> , <i>Today</i> , or <i>Past</i> .

3.3.3 Event Schedule Fields

Field	Required	Limit	Validation & Notes
Start Date & Time *	Yes	Date-time picker	Must be set and must be in the future (for new events). Cannot be after the end date. Click the field to open a calendar and time picker.
End Date & Time *	Yes	Date-time picker	Must be set and must be after the Start Date. The calendar automatically prevents selecting dates before the start date.
Registration Opens *	Yes	Date-time picker	Must be set and must be before the event ends. This is when the registration window opens for students and faculty.
Registration Closes *	Yes	Date-time picker	Must be set, must be after Registration Opens, and must be before or when the event ends. The calendar automatically prevents selecting dates before Registration Opens.

3.3.4 Date Validation Rules

The system enforces strict date validation to ensure your event schedule is logically sound:

- **End date must be after start date.** You cannot create a same-day event where the end time is before the start time.
- **Registration close must be after registration open.** The registration window must span at least a few minutes.

- **Registration must open before the event ends.** Students and faculty must have at least some time to register before the event concludes.
- **Registration must close before or when the event ends.** Late registrations are not permitted; registration must close by the time the event finishes.

If any rule is violated, a red error message will appear below the relevant date field. Fix the date and try again.

The screenshot shows the 'Event Schedule' form with four date and time fields: 'START DATE & TIME', 'END DATE & TIME *', 'REGISTRATION OPENS', and 'REGISTRATION CLOSES'. Each field contains a calendar icon, a date field (all set to 'May 23, 2026'), a time field (set to '06:00 PM', '07:30 PM', '06:00 PM', and '06:00 PM' respectively), and a close button. Below the 'REGISTRATION CLOSES' field, a red error message is displayed: 'Registration Error' followed by 'Registration close must be after open.'

Figure 42: Events Creating and Editing — Data Validation Error

3.3.5 Form Validation and Submission

- **Required fields:** All fields marked with an asterisk (*) are required. You cannot submit the form without filling them in.
- **Character limits:** Fields with character limits will not accept input beyond the maximum. For example, the Title field stops accepting input after 500 characters.
- **Discard changes confirmation:** If you have unsaved changes and close the form or navigate away, a modal will ask if you want to discard your changes. Click “Keep Editing” to stay in the form, or “Discard” to leave without saving.
- **Submission status:** While the form is submitting, the submit button shows “Creating...” or “Saving...” and becomes disabled. If a banner image is being uploaded, the button shows “Uploading banner. . .”. Do not close the page or refresh while uploading.
- **Success feedback:** After a successful submission, you will see a green success notification confirming that the event was created or updated. The page then returns to the events list.
- **Error handling:** If an error occurs (e.g., network failure, invalid banner file), an error message will appear in the form. Read the message to understand what went wrong, fix the issue, and try again.

3.3.6 Tips for Event Creation

- Plan registration windows early. Open registration at least one week before the event, and close it at least a few hours before the event starts (or when it ends).
- Choose descriptive titles. Use clear event names that tell students what to expect (e.g., “GSO: Inclusive Language and Allyship” instead of just “GSO”).
- Write helpful descriptions. Include learning objectives, prerequisites, and what participants will take away. This encourages sign-ups.
- Set realistic capacities. Consider the venue size and equipment. If your venue can fit 40 people comfortably, set the capacity to 40, not 100.
- Add a banner image. Events with eye-catching banners get more registrations. Use high-quality images that are relevant to the event topic.
- Test date fields. Before submitting, carefully review all four date fields to make sure the registration window and event schedule make sense together.

3.3.7 Checking and Marking User Attendance

The **Registrations and Attendance** tab in the event detail modal allows you to view all users who registered for an event and mark them as attended. This is how you record who attended the event.

Figure 43: Events Management — Registrations Tab

Figure 44: Events Management — Attendance Tab

Accessing the Attendance Section

- Click on any event row in the table to open the **Event Detail Modal**.
- At the top of the modal, click the **Registrations and Attendance** tab to switch from the event details view.
- The tab displays counts of total registrations and current attendance.

Registrations vs. Attendance The tab is divided into two sections:

- **Registered Users** — All users who signed up for the event (includes both attended and no-shows).
- **Attended Users** — Only users who have been marked as attended (updates in real-time as you mark checkboxes).

Figure 45: Events Management — Registration and Attendance Counts

Searching for a User To find a specific user quickly:

1. In the Registered Users section, find the **Search bar** above the user table.
2. Type the user's **first name, last name, or email address**.
3. Results filter in real-time as you type. The table shows only matching users.
4. To see all users again, clear the search box.

Figure 46: Events Management — Search Registered Users

Marking a Single User as Attended Here is the step-by-step process to mark one user as attended:

1. **Open the event detail modal.** Click on any event in the list.
2. **Go to Registrations tab.**
3. **Search for the user (optional).** If the list is long, type their name or email in the search bar to find them quickly.
4. **Locate the user's row.** Scroll through the Registered Users table to find the person you want to mark as attended.
5. **Check the checkbox.** In the rightmost column of the user's row, there is a checkbox. Click it to mark the user as attended.
6. **Observe the update.** The checkbox becomes checked. The user will then appear in the Attendance Tab.
7. **Repeat as needed.** Continue checking off users as they arrive or complete the event.

NAME	EMAIL	PRESENT
Arielle	aasolis@up.edu.ph	☐

Figure 47: Events Management — Marking Users as Attended (Unchecked)

NAME	EMAIL	PRESENT
Arielle	aasolis@up.edu.ph	☒

Figure 48: Events Management — Marking Users as Attended (Checked)

Registered Users Table Columns The Registered Users section displays the following columns:

- **Full Name** — User's full name as registered in the system.
- **Email** — User's email address.
- **Attended (Checkbox)** — A checkbox in the rightmost column. Check this to mark the user as attended.

NAME	EMAIL	PRESENT
Arielle	aasolis@up.edu.ph	☒
ShaunTheSheep	sbabiva@up.edu.ph	☒
User DisplayName	jenshooakt@gmail.com	☐
imwinter	beanovesteras@gmail.com	☒

Figure 49: Events Management — Registered Users Table

Attended Users Section Below the Registered Users table, the **Attended Users** section shows all users you have marked as attended. This section displays:

- **Full Name** — User’s full name.
- **Email** — User’s email address.
- List is updated automatically as you check attendance checkboxes.
- This section provides a quick summary of who attended.

NAME	EMAIL
Arielle	aasolis@up.edu.ph
ShaunTheSheep	sbabiva@up.edu.ph
imwinter	beanovesteras@gmail.com

Figure 50: Events Management — Attended Users Table

Unchecking (Removing Attendance) If you accidentally mark a user as attended, you can undo it:

1. **Find the user.** Search or scroll to locate the user in the Registered Users table.
2. **Uncheck the checkbox.** Click the checkbox again to uncheck it.
3. **Observe the update.** The checkbox becomes unchecked. The attendance count decreases by one. The user is removed from the Attended Users section.

Bulk Workflow: Marking Multiple Users at an Event For events with many registrations, here is an efficient workflow:

1. **Prepare a list.** As users arrive, ask their names as they enter.
2. **Open the event.** Click the event in the management page to open its detail modal.
3. **Go to attendance tab.** Click Registrations and Attendance.
4. **Work through attendees one by one.** For each person who arrived:
 - (a) Search for their name (if needed).

- (b) Check their attendance checkbox.
 - (c) Move to the next person.
5. **Monitor the count.** The attendance counter updates in real-time, so you can see progress.
 6. **Close the modal.** The attendance data is automatically saved. No additional save button is needed.

Important Notes

- **Real-time updates.** Attendance changes are saved immediately. You do not need to manually save.
- **No attendance email.** Marking a user as attended does NOT automatically send them a notification. Attendance is for admin records only.
- **Change history.** The system does not keep a log of who was checked/unchecked and when.
- **Report data.** The final attendance numbers are used in institutional reports and surveys. Ensure accuracy before closing the event.

Tips for Efficient Attendance Tracking

- **Delegate during the event.** Have a staff member manage attendance check-in.
- **Use search strategically.** For large events, search by first or last name in batches rather than scrolling through hundreds of names.

4 Users Management

The **Users Management** page lets you view all registered users, create new accounts, edit existing ones, and manage user data. This page is **only available to Admin users**.

Figure 51: Users Management — List View

4.1 Toolbar and Controls

At the top of the Users page, you will find several controls for searching, sorting, filtering, and creating users:

Figure 52: Users Management — Toolbar

4.1.1 Search Bar

Type a keyword to search users by full name, email, or role. Results filter in real-time as you type.

Field	Required	Limit	Validation & Notes
Search query	No	—	Type to filter by user full name, email address, or role. Searches are case-insensitive. Clearing the search box shows all users again.

Figure 53: Users Management — Search

4.1.2 Sort Dropdown

Click the **Sort** button (with an up/down arrow icon) to open the sort menu. You can sort users by:

- **Full Name** — Alphabetically by user’s full name, ascending or descending.
- **Email** — Alphabetically by email address, ascending or descending.
- **Role** — Alphabetically by role (Admin, Staff, Faculty, Student), ascending or descending.

Click the same sort option again to reverse the sort direction (ascending ↑ or descending ↓). The current sort field and direction are displayed on the button. You can also click “Reset sort” in the menu to return to the default sort (Full Name, ascending).

Figure 54: Users Management — Sort Options

4.1.3 Filter Dropdown

Click the **Filter** button (with a sliders icon) to open the filter panel. The filter button displays a badge showing the number of active filters (e.g. “Filter 2” if two filters are selected).

You can filter users by:

Role

- **Student** — Users with the Student role.
- **Faculty** — Users with the Faculty role.
- **Staff** — Users with the Staff role.
- **Admin** — Users with the Admin role.

You can select multiple roles. For example, selecting both “Student” and “Faculty” shows all students and faculty members, excluding staff and admins.

Figure 55: Users Management — Filter Options

Active Filter Chips Once you apply filters, they appear as coloured **chips** below the toolbar. Each chip shows the filter name and an “×” button to remove it. You can also click “Clear all filters” in the filter dropdown to remove all active filters at once.

Figure 56: Users Management — Active Filter Chips

4.1.4 Add User Button

Click the **Add User** button to create a new user account. This opens the user creation form (see Creating or Editing a User below).

Figure 57: Users Management — Add User Button

4.2 Viewing and Interacting with Users

Users are displayed in a table with the following columns:

- **User** — Full name (truncated if too long; hover to see full name).

- **Email** — Email address.
- **Role** — Role badge (Student, Staff, Faculty, or Admin).
- **Total Events Attended** — Count of all events the user has attended across all categories.
- **Actions** — Edit and Delete buttons.

4.2.1 Viewing User Details

Click anywhere on a user row to open the **User Detail Modal**. This modal displays:

- User's name, email, and role badge.
- Personal information (display name, pronouns, contact number, address).
- Identity information (sex at birth, gender identity).
- Role-specific information:
 - *Student*: Student number, year level, college, program.
 - *Faculty*: College, department.
 - *Staff/Admin*: Office or unit.
- Session attendance counts (GSO, ASHO, Forums, Research, Training, Workshops).
- Onboarding status.
- **Edit** button to modify the user.

The screenshot shows a modal window for a user named Shaun Julius Abiva, identified as a Student. The modal is divided into several sections:

- Header:** Displays the user's name, email (sbabiva@up.edu.ph), a social media handle (ShaunTheSheep), a student ID (202316419), and an 'Edit user' button.
- ACADEMIC PROFILE:**
 - COLLEGE:** College of Science (CS)
 - PROGRAM:** BS Computer Science
 - YEAR LEVEL:** 3rd Year
- DETAILS:**
 - CONTACT NUMBER:** 0999999998
 - ADDRESS:** Marville, Benguet
 - GENDER IDENTITY:** Prefer not to say
 - SEX AT BIRTH:** Male
 - PRONOUNS:** he/him
- STATUS:** ONBOARDING Complete (indicated by a green pill).
- EVENTS ATTENDED:** A summary showing 18 total events, broken down by category:

Category	Count
GSO	3
ASHO	2
FORUM	5
RESEARCH	4
TRAINING	2
WORKSHOP	2

Figure 58: Users Management — User Detail Modal

4.2.2 Edit a User

Click the **Edit** (pencil) icon in the Actions column, or click the **Edit** button in the user detail modal. This opens the user form in edit mode. Make your changes and click “Save Changes” to update the user. See *Creating or Editing a User* below for field details.

4.2.3 Delete a User

Click the **Delete** (trash) icon in the Actions column to delete a user. A confirmation modal will appear.

Figure 59: Users Management — Actions (Edit and Delete Icons)

Delete Confirmation

- The modal shows the user’s name and email you are about to delete.
- You must enter your password to confirm. This is a security measure to prevent accidental deletions.
- **Warning:** Deleting a user will permanently remove all account data, event registrations, attendance records, and survey responses. This action **cannot be undone**.

After confirming your password, the user and all associated data will be deleted, and you will see a success notification.

Figure 60: Users Management — Delete Confirmation Window

4.2.4 Pagination

If you have more than one page of users, pagination controls appear at the bottom of the table. Use the navigation buttons to move between pages. The display shows which users are currently shown (e.g. “Showing 1–10 of 156 users”).

Figure 61: Users Management — User Pagination

4.3 Creating or Editing a User

1. **Click the “Add User” button or edit icon.** On the Users page, click the “Add User” button to create a new user account, or click the **edit (pencil) icon** on an existing user row to modify their account.
2. **Complete the five form sections.** The user form is organized into five sections: *Account Information*, *Personal Information*, *Role-Specific Fields*, *Identity*, and *Session Attendance*. See the subsections below for detailed field descriptions.
3. **Fill in all required fields.** Fields marked with an asterisk (*) are required. You cannot submit the form without completing them. Optional fields may be left blank.
4. **Verify your information.** Review all entries for accuracy before submitting. Pay special attention to email addresses, student numbers (if applicable), and role-specific information.
5. **Submit the form.** Scroll to the bottom of the form and click the “Create User” button (for new users) or “Save Changes” button (for editing existing users).

6. **Confirm success.** A green success notification appears confirming the user was created or updated. The page returns to the users list.

Figure 62: User Management — Create User Form

The image shows a mobile application interface for editing a user. At the top, there's a title 'Edit User' with a close button (X) in the top right corner. Below the title, the current user's name 'Carlo Luayon' is displayed. The form is organized into sections: 'ACCOUNT INFORMATION' and 'PROFILE DETAILS'. Under 'ACCOUNT INFORMATION', there are fields for 'FULL NAME *' (containing 'Carlo Luayon'), 'EMAIL *' (containing 'chluayon@up.edu.ph'), 'PASSWORD (LEAVE BLANK TO KEEP)' (with a hint 'Leave blank to keep current'), and 'ROLE *' (a dropdown menu set to 'Admin'). Under 'PROFILE DETAILS', there are fields for 'DISPLAY NAME' (containing 'Carlo'), 'OFFICE / UNIT' (containing 'Kasarian Office'), 'CONTACT NUMBER (OPTIONAL)' (containing '09878789987'), and 'ADDRESS (OPTIONAL)' (containing 'City, Province'). At the bottom, there is a 'PROMPTS' section which is currently empty.

Figure 63: User Management — Edit User Form

4.3.1 Creating vs. Editing a User

The user form works in two modes: create mode (for new users) and edit mode (for modifying existing users).

Create Mode (Adding a New User)

- **Access:** Click the “Add User” button at the top of the Users page.
- **All fields blank:** All form fields start empty. You must fill in all required fields.
- **Submit button:** Shows “Create User” at the bottom of the form.
- **Result:** New user account is created and added to the system. The user can log in with the email and temporary password you provided.

Edit Mode (Modifying an Existing User)

- **Access:** Click the edit (pencil) icon in the Actions column of a user row, or click the “Edit” button in the user detail modal.
- **Pre-filled fields:** All fields are pre-populated with the user’s current information.
- **Password optional:** Password field is empty. Leave it blank to keep the current password, or enter a new password to change it.
- **Submit button:** Shows “Save Changes” at the bottom of the form.
- **Role change warning:** If you change a user’s role (e.g., from Student to Faculty), a confirmation modal appears warning that role-specific fields will be reset. Confirm to proceed.
- **Result:** User account is updated. The user’s next login will use the updated information. If you changed the password, they use the new one.

Discard Changes Confirmation When editing a user, if you close the form or navigate away with unsaved changes, a modal appears asking if you want to discard your changes.

- **“Keep Editing”** — Stay in the form to continue editing.
- **“Discard”** — Leave the form without saving. All changes are lost.

This prevents accidental loss of data.

Figure 64: User Management — Discard Changes Window

Figure 65: Users Management — Role Change Confirmation

4.3.2 Account Information Fields

Field	Required	Limit	Validation & Notes
Full Name *	Yes	64–100 chars	Cannot be empty. Only letters, spaces, periods, apostrophes, hyphens, and underscores are allowed. Enter the user's legal name.
Email *	Yes	50 chars	Must be a valid email ending in @gmail.com or @up.edu.ph. Emails must be unique; you cannot use an email that is already registered.
Password *	Cond.	8–128 chars	Required when creating a new user. When editing, leave blank to keep the current password. Must be at least 8 characters. Use strong passwords with a mix of letters, numbers, and symbols.
Role *	Yes	Dropdown	Choose one: Admin, Staff, Faculty, or Student. Changing the role on an existing user will trigger a confirmation prompt and reset role-specific fields.

4.3.3 Personal Information Fields

Field	Required	Limit	Validation & Notes
Display Name	No	30 chars	A nickname or preferred name. Only letters, spaces, and basic punctuation are allowed. This is optional and does not need to match the full name.

Field	Required	Limit	Validation & Notes
Contact Number	No	11 digits	Only digits are allowed (e.g. “09123456789”). Must be exactly 11 digits if provided. This is typically a mobile number.
Address	No	64–100 chars	Free-text field for the user’s home or work address.

4.3.4 Role-Specific Fields

Depending on the selected role, additional fields will appear:

Student-Only Fields

Field	Required	Limit	Validation & Notes
Student Number *	Yes	9 digits	Only digits allowed. The system automatically derives the year level from the first 4 digits (admission year). Must be exactly 9 digits.
Year Level *	Yes	Dropdown	Options: 1st Year, 2nd Year, 3rd Year, 4th Year, 5th Year, or Extender. Automatically set when a valid student number is entered. A warning appears if the selected year does not match the derived year.
College *	Yes	Dropdown	Choose one: College of Science (CS), College of Arts and Communication (CAC), or College of Social Sciences (CSS).
Program *	Yes	Dropdown	Options depend on the selected college. You must select a college first. Choose the student’s major or degree program.

Faculty-Only Fields

Field	Required	Limit	Validation & Notes
College	No	Dropdown	Same options as students (CS, CAC, CSS). Optional for faculty members.
Department	No	64 chars	Free-text (e.g. “Dept. of Math and Computer Science”). Enter the faculty member’s department or academic unit.

Admin and Staff Fields

Field	Required	Limit	Validation & Notes
Office / Unit	No	64 chars	Free-text (e.g. “Office of the Chancellor”). Enter the admin or staff member’s office or department.

4.3.5 Identity Fields (All Roles)

Field	Required	Limit	Validation & Notes
Pronouns	No	Dropdown	Options: he/him, she/her, they/them, he/they, she/they, any/all, or Prefer not to say. Optional field to respect user identity.
Sex at Birth *	Yes	Dropdown	Options: Male, Female, Intersex, or Prefer not to say. Required for institutional reporting purposes.
Gender Identity *	Yes	Dropdown	Options: Man, Woman, Non-binary, Genderqueer, Genderfluid, or Prefer not to say. Required to capture user’s gender identity.

4.3.6 Session Attendance Fields (Students & Faculty)

These fields track how many orientation/session events a user has attended. Each field accepts a whole number from **0 to 5**.

Field	Required	Limit	Validation & Notes
GSO Sessions	No	0–5	Number of Gender Sensitivity Orientation sessions the user has attended.
ASHO Sessions	No	0–5	Number of Anti-Sexual Harassment Orientation sessions the user has attended.
Forums	No	0–5	Number of forum sessions the user has attended.
Research	No	0–5	Number of research sessions the user has attended.
Training	No	0–5	Number of training sessions the user has attended.
Workshops	No	0–5	Number of workshop sessions the user has attended.

4.3.7 Onboarding Toggle

Field	Required	Limit	Validation & Notes
Onboarding complete	No	Toggle	Indicates whether the user has finished the onboarding process. Defaults to <i>on</i> . Turn it off to force the user through onboarding again on their next login.

4.3.8 Form Validation and Submission

- **Required fields:** All fields marked with an asterisk (*) are required. You cannot submit the form without filling them in.
- **Field validation:** The form validates specific fields in real-time. For example, the student number must be exactly 9 digits, and the contact number must be 11 digits.
- **Email uniqueness:** The system checks that the email is not already in use by another account.
- **Role-specific validation:** When you change a user's role, role-specific fields are reset. The form will ask you to confirm this action.
- **Character limits:** Fields with character limits will not accept input beyond the maximum.
- **Discard changes confirmation:** If you have unsaved changes and close the form or navigate away, a modal will ask if you want to discard your changes. Click “Keep Editing” to stay in the form, or “Discard” to leave without saving.
- **Submission status:** While the form is submitting, the submit button shows “Creating...” or “Saving...” and becomes disabled. Do not close the page or refresh while submitting.
- **Success feedback:** After a successful submission, you will see a green success notification confirming that the user was created or updated. The page then returns to the users list.
- **Error handling:** If an error occurs (e.g. network failure, email already exists), an error message will appear in the form. Read the message to understand what went wrong, fix the issue, and try again.

4.3.9 Tips for User Management

- Use consistent naming conventions. Ensure full names are formatted consistently (e.g., “John Doe” not “JOHN DOE”).
- Verify email addresses carefully. Typos in email addresses prevent users from receiving important notifications. Double-check before creating accounts.
- Set strong passwords. When creating accounts for others, provide temporary strong passwords and ensure they change them on first login.
- Complete student information. If importing student data, ensure student numbers, year levels, colleges, and programs are accurate. These fields are used for reporting.

- Track attendance manually only when necessary. The system automatically tracks event attendance when users register and attend events. Only manually update the Session Attendance fields if a user attended an event without registering.
- Review role assignments. Ensure users are assigned the correct role (Student, Faculty, Staff, Admin) based on their institutional status.
- Archive instead of delete. Consider whether a user truly needs to be deleted or if they should be deactivated instead. Deletion is permanent and removes all history.

5 Guidelines Management

The **Guidelines Management** page lets you create, edit, view, and delete informational documents (e.g. “Gender and Technology”) that are visible to all users. You can search, sort, and manage guideline content.

Figure 66: Guidelines Management — List View

5.1 Toolbar and Controls

At the top of the Guidelines page, you will find several controls for searching, sorting, and creating guidelines:

Figure 67: Guidelines Management — Toolbar

5.1.1 Search Bar

Type a keyword to search guidelines by title or description. Results filter in real-time as you type.

Field	Required	Limit	Validation & Notes
Search query	No	—	Type to filter by guideline title or content. Searches are case-insensitive. Clearing the search box shows all guidelines again.

Figure 68: Guidelines Management — Search

5.1.2 Sort Dropdown

Click the **Sort** button (with an up/down arrow icon) to open the sort menu. You can sort guidelines by:

- **Title** — Alphabetically by guideline name, ascending or descending (default).

Click the same sort option again to reverse the sort direction (ascending ↑ or descending ↓). The current sort field and direction are displayed on the button.

Figure 69: Guidelines Management — Sort Options

5.1.3 Add Guideline Button

Click the **Add Guideline** button to create a new guideline. This opens the guideline creation form (see Creating or Editing a Guideline below).

Figure 70: Guidelines Management — Add Guideline Button

5.2 Viewing and Interacting with Guidelines

Guidelines are displayed in a table with the following columns:

- **Title** — Guideline name (truncated if too long; hover to see full title).
- **Description** — Guideline summary or first line of content (truncated; hover to see full text).
- **Actions** — Edit and Delete buttons.

5.2.1 Viewing Guideline Details

Click anywhere on a guideline row to open the **Guideline Detail Modal**. This modal displays:

- Full guideline title at the top.
- Complete guideline content/description.
- **Edit** button to modify the guideline.

Figure 71: Guidelines Management — Guideline Detail Modal

5.2.2 Edit a Guideline

Click the **Edit** (pencil) icon in the Actions column, or click the **Edit** button in the guideline detail modal. This opens the guideline form in edit mode. Make your changes and click “Save Changes” to update the guideline. See *Creating or Editing a Guideline* below for field details.

5.2.3 Delete a Guideline

Click the **Delete** (trash) icon in the Actions column to delete a guideline. A confirmation modal will appear.

Figure 72: Guidelines Management — Actions (Edit and Delete Icons)

Delete Confirmation

- The modal shows the guideline title you are about to delete.
- You must enter your password to confirm. This is a security measure to prevent accidental deletions.
- **Warning:** Deleting a guideline will permanently remove it. This action **cannot be undone**.

After confirming your password, the guideline will be deleted, and you will see a success notification.

Figure 73: Guidelines Management — Delete Confirmation Window

5.2.4 Pagination

If you have more than one page of guidelines, pagination controls appear at the bottom of the table. Use the navigation buttons to move between pages. The display shows which guidelines are currently shown (e.g. “Showing 1–5 of 5 guidelines”).

Figure 74: Guidelines Management — Guideline Pagination

5.3 Creating or Editing a Guideline

Click the “**Add Guideline**” button on the Guidelines page (or the edit icon on an existing guideline) to open the guideline form.

The screenshot shows a modal window titled "Add Guideline" with a close button in the top right corner. Below the title is a section header "Guideline Information". The form contains two main input fields: a "TITLE *" field with a placeholder "e.g. Gender and Technology" and a "DESCRIPTION" field with a placeholder "Add Description...". The description field is a large text area. At the bottom right of the form are two buttons: "Cancel" and "Create Guideline".

Figure 75: Guidelines Management — Create Guideline Form

The 'Edit Guideline' form is a modal window with a title bar containing a close button. It is titled 'Edit Guideline' with a subtitle 'UP Gender Guidelines'. The form is divided into two main sections: 'Guideline Information' and 'DESCRIPTION'. The 'Guideline Information' section has a 'TITLE *' field with the text 'UP Gender Guidelines'. The 'DESCRIPTION' section has a text area containing the following text: 'Guidelines on Promoting Women's Empowerment and Gender Equality in the University of the Philippines Approved by the UP Board of Regents on its 1309th Meeting, 22 July 2015'. Below this is a 'PREAMBLE' section with five paragraphs of text. At the bottom right of the form are two buttons: 'Cancel' and 'Save Changes'.

UP Gender Guidelines

Guideline Information

TITLE *

UP Gender Guidelines

DESCRIPTION

Guidelines on Promoting Women's Empowerment and Gender Equality in the University of the Philippines Approved by the UP Board of Regents on its 1309th Meeting, 22 July 2015

PREAMBLE

WHEREAS, the University of the Philippines, hereinafter referred to as "the University", upholds the principles of human rights and gender equality;

WHEREAS, the University upholds the 1987 Constitution which explicitly recognizes the role of women in nation building and the fundamental equality before the law of women and men, as well as the Magna Carta of Women (Republic Act No. 9710) and its implementing rules and regulations;

WHEREAS, the University seeks to ensure that the potentials of all persons, specifically those who are marginalized and socially excluded, are fully developed;

WHEREAS, the University condemns all forms of discrimination and violence that are obstacles to the full participation of women in economic, social, cultural, civil and political life of the University and the nation;

THEREFORE, the University commits to provide an intellectual, healthy, gender-friendly environment that promotes gender equality within the premises and jurisdiction of the University and shall adopt gender mainstreaming as a strategy to implement the Magna Carta of Women and strictly implement policies

Cancel Save Changes

Figure 76: Guidelines Management — Edit Guideline Form

The 'Discard Changes' window is a modal dialog with a title bar containing a close button. It is titled 'Discard Changes?'. Inside the dialog is a pink warning box with the text 'Warning You have unsaved changes. Are you sure you want to discard them?'. At the bottom of the dialog are two buttons: 'Keep Editing' and 'Discard'.

Discard Changes?

Warning
You have unsaved changes. Are you sure you want to discard them?

Keep Editing Discard

Figure 77: Guidelines Management — Discard Changes Window

5.3.1 Guideline Fields

Field	Required	Limit	Validation & Notes
Title *	Yes	500 chars	Cannot be empty. Briefly describe the guideline (e.g. “Gender and Technology”).
Description	No	100 000 chars	A long-form text area for the guideline content. This supports detailed, multi-paragraph content. If provided, must be at least 10 characters long.

5.3.2 Form Validation and Submission

- **Required fields:** All fields marked with an asterisk (*) are required. You cannot submit the form without filling them in.
- **Character limits:** Fields with character limits will not accept input beyond the maximum.
- **Discard changes confirmation:** If you have unsaved changes and close the form or navigate away, a modal will ask if you want to discard your changes. Click “Keep Editing” to stay in the form, or “Discard” to leave without saving.
- **Submission status:** While the form is submitting, the submit button shows “Creating...” or “Saving...” and becomes disabled. Do not close the page or refresh while submitting.
- **Success feedback:** After a successful submission, you will see a green success notification confirming that the guideline was created or updated. The page then returns to the guidelines list.
- **Error handling:** If an error occurs (e.g. network failure), an error message will appear in the form. Read the message to understand what went wrong, fix the issue, and try again.

5.3.3 Tips for Guideline Creation

- Use clear, descriptive titles. Titles should convey the topic at a glance (e.g. “Gender and Technology: Bridging the Digital Divide” instead of just “Guidelines”).
- Write comprehensive content. Use the description field to provide detailed, well-structured information. Break up long text with clear sections and bullet points for readability.
- Review for accuracy. Before publishing, carefully review your content for typos, factual errors, and clarity. Poor documentation creates confusion.
- Update regularly. If guidelines become outdated, edit them promptly. Users rely on current information.

6 Surveys Management

The **Surveys Management** page lets you create post-event feedback forms, view responses, edit surveys, and analyze results. You can search, filter, sort, and manage survey data for all linked events.

Figure 78: Surveys Management — List View

6.1 Toolbar and Controls

At the top of the Surveys page, you will find several controls for searching, sorting, filtering, and creating surveys:

Figure 79: Surveys Management — Toolbar

6.1.1 Search Bar

Type a keyword to search surveys by title, description, or linked event. Results filter in real-time as you type.

Field	Required	Limit	Validation & Notes
Search query	No	—	Type to filter by survey title, description, or event name. Searches are case-insensitive. Clearing the search box shows all surveys again.

Figure 80: Surveys Management — Search

6.1.2 Sort Dropdown

Click the **Sort** button (with an up/down arrow icon) to open the sort menu. You can sort surveys by:

- **Title** — Alphabetically by survey name, ascending or descending.
- **Status** — By status (Upcoming, Open, Closed).
- **Date** — By open date, ascending or descending (default).

Click the same sort option again to reverse the sort direction (ascending ↑ or descending ↓). The current sort field and direction are displayed on the button. You can also click “Reset sort” in the menu to return to the default sort (Date, descending).

Figure 81: Surveys Management — Sort Options

6.1.3 Filter Dropdown

Click the **Filter** button (with a sliders icon) to open the filter panel. The filter button displays a badge showing the number of active filters (e.g. “Filter 1” if one filter is selected).

You can filter surveys by:

Status

- **Upcoming** — Surveys that have not yet opened.
- **Open** — Surveys currently accepting responses.
- **Closed** — Surveys that have closed to responses.

You can select multiple statuses. For example, selecting both “Open” and “Closed” shows all surveys that are no longer accepting new responses.

Figure 82: Surveys Management — Filter Options

Active Filter Chips Once you apply filters, they appear as coloured **chips** below the toolbar. Each chip shows the filter name and an “×” button to remove it. You can also click “Clear all filters” in the filter dropdown to remove all active filters at once.

Figure 83: Surveys Management — Active Filter Chips

6.1.4 Add Survey Button

Click the **Add Survey** button to create a new survey. This opens the survey creation form (see Creating or Editing a Survey below).

Figure 84: Surveys Management — Add Survey Button

6.2 Viewing and Interacting with Surveys

Surveys are displayed in a table with the following columns:

- **Title** — Survey name (truncated if too long; hover to see full title).
- **Status** — Colour-coded status badge (Upcoming, Open, or Closed).
- **Opens** — Survey opening date.

- **Closes** — Survey closing date.
- **Actions** — View Analytics, Edit, and Delete buttons.

6.2.1 Viewing Survey Details and Analytics

Click anywhere on a survey row, or click the **Analytics** (chart) icon to open the **Survey Analytics Modal**. This modal displays:

- Full survey title and linked event name.
- Survey open and close dates.
- Complete question-by-question analytics.
 - Multiple-choice questions: Horizontal bar charts showing response counts and percentages.
 - Yes/No questions: Pie charts showing the split between “Yes” and “No”.
 - Likert Scale questions: Stacked bar charts with statistics (Average, Median, Standard Deviation).
 - Open-ended text questions: Paginated cards displaying respondent feedback.

Figure 85: Surveys Management — Survey Analytics Modal

Survey Analytics Details Each question in the analytics view displays results in a format tailored to the question type:

Survey Analytic	What It Displays	What the Data Means
Multiple Choice	Horizontal Bar Charts	Shows total count and percentage of users who selected each option

Yes / No	Donut Pie Chart	Shows the absolute count and percentage split between the “Yes” and “No” option
Likert Scale	Stacked Horizontal Bar Chart with a Statistics Grid	Shows distribution of answers from “Strongly Agree” to “Strongly Disagree”. Also includes overall sentiment score (Average), exact middle rating (Median), and overall consensus (Standard Deviation)
Open-ended Text	Paginated list of text cards	Text-based feedback from each respondent, displayed one response per card for easy review

Figure 86: Surveys Management — Survey Analytics Examples

6.2.2 Edit a Survey

Click the **Edit** (pencil) icon in the Actions column. This opens the survey form in edit mode. Make your changes and click “Save Changes” to update the survey. See *Creating or Editing a Survey* below for field details.

6.2.3 Delete a Survey

Click the **Delete** (trash) icon in the Actions column to delete a survey. A confirmation modal will appear.

Figure 87: Surveys Management — Actions (View, Edit, and Delete Icons)

Delete Confirmation

- The modal shows the survey title you are about to delete.
- You must enter your password to confirm. This is a security measure to prevent accidental deletions.
- **Warning:** Deleting a survey will permanently remove all survey responses and linked data. This action **cannot be undone**.

After confirming your password, the survey and all associated responses will be deleted, and you will see a success notification.

Figure 88: Surveys Management — Delete Confirmation Window

6.2.4 Pagination

If you have more than one page of surveys, pagination controls appear at the bottom of the table. Use the navigation buttons to move between pages. The display shows which surveys are currently shown (e.g. “Showing 1–10 of 34 surveys”).

Figure 89: Surveys Management — Survey Pagination

6.3 Creating or Editing a Survey

Click the “Add Survey” button on the Surveys page (or the edit icon on an existing survey) to open the survey form. The form is organized into three sections: *Survey Details*, *Availability*, and *Questions*.

TITLE *

Sexual Harassment Reporting Training Feedback Survey

DESCRIPTION

Thank you for participating in the Sexual Harassment Reporting Training. This feedback survey aims to gather your insights, experiences, and suggestions regarding the training's content, delivery, and overall effectiveness. Your responses will help us assess how well the training enhanced participants' understanding of sexual harassment reporting procedures, rights, responsibilities, and support mechanisms.

Figure 93: Surveys Management — Discard Changes Window

6.3.1 Survey Details Fields

Field	Required	Limit	Validation & Notes
Title *	Yes	500 chars	Cannot be empty (e.g. “Post-Event Feedback Form”). Briefly describe the survey.
Description	No	3 000 chars	If provided, must be at least 5 characters long. Provide context or instructions for respondents.
Linked Event *	Yes	Dropdown	Select the event this survey is for. The placeholder “Select linked event” is disabled once a choice is made. You cannot change the linked event after creation.
Status	Auto	—	Automatically calculated from the open and close dates. Display only. Possible values: <i>Upcoming</i> , <i>Open</i> , or <i>Closed</i> .

6.3.2 Availability Fields

Field	Required	Limit	Validation & Notes
Opens At *	Yes	Date-time picker	When the survey becomes available to respondents. Must be in the future for new surveys. Minimum selectable date is the linked event’s end date. Click the field to open a calendar and time picker.

Field	Required	Limit	Validation & Notes
Closes At *	Yes	Date-time picker	When the survey stops accepting responses. Must be after the Opens At date. The calendar automatically prevents selecting dates before the open date.

6.3.3 Date Validation Rules

The system enforces strict date validation to ensure your survey schedule is logically sound:

- **Open date must be after the linked event ends.** Surveys cannot open before the event is complete.
- **Close date must be after open date.** The survey window must span at least a few minutes.
- **Open date must be in the future.** You cannot create a survey that is already open.

If any rule is violated, a red error message will appear below the relevant date field. Fix the date and try again.

6.3.4 Questions Section

You can add up to **50 questions** per survey. Each question has the following fields:

Field	Required	Limit	Validation & Notes
Question Text *	Yes	500 chars	The question you want to ask (e.g. “How would you rate this event?”).
Question Type *	Yes	Dropdown	Choose one: <i>Text (open-ended)</i> , <i>Multiple Choice</i> , <i>Likert Scale (1–5)</i> , or <i>Yes / No</i> .
Choices	Cond.	Up to 10 choices	Only shown for Multiple Choice questions. At least 2 non-empty choices are required. Duplicate choices are not allowed.

Field	Required	Limit	Validation & Notes
Required toggle	No	Checkbox	If checked, respondents must answer this question before submitting the survey.

Figure 95: Surveys Management — Questions Section

Figure 96: Surveys Management — Question Type Selection

6.3.5 Form Validation and Submission

- **Required fields:** All fields marked with an asterisk (*) are required. You cannot submit the form without filling them in.
- **Question requirements:** At least one question is required. Multiple-choice questions must have at least 2 non-empty, non-duplicate choices.
- **Character limits:** Fields with character limits will not accept input beyond the maximum.
- **Discard changes confirmation:** If you have unsaved changes and close the form or navigate away, a modal will ask if you want to discard your changes. Click “Keep Editing” to stay in the form, or “Discard” to leave without saving.

- **Submission status:** While the form is submitting, the submit button shows “Creating...” or “Saving...” and becomes disabled. Do not close the page or refresh while submitting.
- **Success feedback:** After a successful submission, you will see a green success notification confirming that the survey was created or updated. The page then returns to the surveys list.
- **Error handling:** If an error occurs (e.g. network failure, invalid event), an error message will appear in the form. Read the message to understand what went wrong, fix the issue, and try again.

6.3.6 Tips for Survey Creation

- Plan opening windows strategically. Open the survey immediately after an event ends or the next day. Close it 1–2 weeks later to capture maximum feedback while the event is fresh in respondents’ minds.
- Keep surveys short. Aim for 5–10 questions. Longer surveys have lower completion rates.
- Use clear, unbiased wording. Avoid leading questions (e.g., “Did you love this event?”) and instead use neutral language (e.g., “How did you feel about this event?”).
- Balance question types. Mix yes/no, multiple choice, and open-ended questions to get both quantitative and qualitative feedback.
- Make critical questions required. Mark questions that capture key metrics (e.g., overall satisfaction) as required so you don’t get incomplete data.
- Test before publishing. If possible, preview the survey in a test mode to ensure questions and choices display correctly and make sense.
- Analyze results promptly. Review survey responses while they are still relevant. Use insights to improve future events.

7 Profile Page

Your **Profile** page lets you view and update your own personal information. It is organized into three tabs: *Personal*, *Professional*, and *Identity*.

The screenshot shows the 'Personal' tab of the Admin Profile Page. At the top, there are three tabs: 'Personal' (active), 'Professional', and 'Identity'. Below the tabs, the form is organized into several sections:

- FULL NAME:** A text input field containing 'Carlo Luayon'.
- DISPLAY NAME:** A text input field containing 'Carlo'.
- PRONOUNS:** A dropdown menu with 'Prefer not to say' selected.
- CONTACT NUMBER:** A text input field containing '09878789987'.
- ADDRESS:** A text input field containing 'Street, Barangay, City, Province'.

At the bottom right of the form, there is a 'Save changes' button with a document icon.

Figure 97: Admin Profile Page — Personal Tab

7.1 Personal Tab

Field	Required	Limit	Validation & Notes
Full Name	Yes	64 chars	Only letters, spaces, and basic punctuation. Cannot be empty.
Display Name	No	32 chars	Only letters, spaces, and basic punctuation.
Pronouns	No	Dropdown	Options: he/him, she/her, they/them, he/they, she/they, any/all, or Prefer not to say.
Contact Number	No	11 digits	Only digits (e.g. “09171234567”). Must be exactly 11 digits if provided.
Address	No	100 chars	Free-text field.

7.2 Professional Tab

Field	Required	Limit	Validation & Notes
Office / Unit	No	64 chars	Your office or unit within the university (e.g. “Office of the Chancellor”).

Figure 98: Admin Profile Page — Professional Tab

7.3 Identity Tab

Field	Required	Limit	Validation & Notes
Sex at Birth	No	Dropdown	Options: Male, Female, Intersex, or Prefer not to say.
Gender Identity	No	Dropdown	Options: Man, Woman, Non-binary, Genderqueer, Genderfluid, or Prefer not to say.

Privacy Note: The identity information is kept strictly private and is used only for institutional reporting. You are not required to fill this out.

Figure 99: Admin Profile Page — Identity Tab

7.4 Profile Card

On the left side of the profile page, you will see a summary card showing:

- Your name and display name.
- Your role badge (“Administrator”) and office.
- Progress bars for session attendance (GSO, ASHO, Forums, Research, Training, Workshops).

Figure 100: Admin Profile Page — Sidebar Summary Card

8 Settings Page

The **Settings** page lets you update your login credentials. It has two sections: *Change Email Address* and *Change Password*.

Figure 101: Settings Page

8.1 Change Email Address

Field	Required	Limit	Validation & Notes
Current Email	Read-only	—	Your current email is shown but cannot be edited directly.
New Email *	Yes	No explicit limit	Must be a valid email address. After submitting, verification links will be sent to both your old and new email addresses. You must confirm from both inboxes.

8.2 Change Password

Note: This section is only available if you signed up with an email and password. If you use Google Sign-In, a message will explain that password management is handled through your Google account.

Field	Required	Limit	Validation & Notes
Current Password *	Yes	16 chars	Your existing password. The system verifies it before allowing a change.
New Password *	Yes	16 chars	Must be at least 8 characters long.
Confirm Password *	Yes	16 chars	Must match the New Password exactly.

9 Tips and Troubleshooting

9.1 Common Validation Errors

Error Message	What To Do
“Full name is required.”	Make sure the Full Name field is not blank.
“Full name can only contain letters, spaces, and basic punctuation.”	Remove any numbers or special characters (e.g. #, &) from the name.
“Email must end with @gmail.com or @up.edu.ph.”	Only these two email domains are accepted.
“Password must be at least 8 characters long.”	Use a longer password with at least 8 characters.
“Contact number must be 11 digits.”	Enter exactly 11 digits with no spaces or dashes.
“Student number must be exactly 9 digits.”	Enter the full 9-digit student number.
“End date must be after the start date.”	Adjust your event dates so the end comes after the start.
“Registration close must be after open.”	Make sure the registration closing date/time is later than the opening date/time.
“At least one question is required.”	Add at least one question to your survey before submitting.
“Question X needs at least 2 non-empty choices.”	Multiple-choice questions need at least 2 answer options that are not blank.

9.2 General Tips

- Save often. Changes are only saved when you click the Save or Submit button.
- Check for red error messages. They appear directly below the field that has a problem.
- Dropdown placeholders are disabled. Once you pick an option from a dropdown (e.g. “Select category”), you cannot go back to the placeholder. Pick a valid option instead.
- Use the search bar. It is the fastest way to find any event, user, guideline, or survey.
- Date pickers enforce minimum dates. For example, the End Date picker will not let you pick a date before the Start Date.

10 Glossary

Term	Definition
GAD	Gender and Development — the university office focused on gender equity programs.
GSO	Gender Sensitivity Orientation — a mandatory orientation session.
ASHO	Anti-Sexual Harassment Orientation — a mandatory orientation session.
Onboarding	The initial setup process a new user completes after their first login (selecting college, program, identity info, etc.).
Likert Scale	A 1-to-5 rating scale commonly used in surveys (1 = Strongly Disagree, 5 = Strongly Agree).
Banner Image	The cover photo shown at the top of an event's detail view.
Modal	A Pop-up window that appears over the current page to show details, form, or messages
Chars	Singular characters including letters (a-z/A-Z), numbers (0-9), and special symbols (! ? @ # \$ % & * () - + = _ [] { } ; : ' " , . / < > \ ~ ^).
